

BABS1201 Molecules, Cells and Organisms

Assessment Task 1: Literature Review

Due Date: Friday Week 5, Term 2 2025

Weighting: 25%

Word Count: 2000 words

Submission: Via Turnitin on Moodle

Learning Outcomes:

LO1: Analyse the structure and function of biological molecules

LO2: Evaluate experimental evidence in molecular biology

LO3: Synthesise information from primary research literature

Task Description:

Write a literature review on a topic of your choice from the approved list below. Your review should critically analyse at least 8 primary research articles and demonstrate understanding of the topic.

Marking Criteria:

High Distinction (85-100): Exceptional critical analysis with original insight

Distinction (75-84): Strong analysis with clear evidence of understanding

Credit (65-74): Adequate analysis with some critical evaluation

Pass (50-64): Basic understanding demonstrated with limited analysis

Fail (0-49): Insufficient understanding or analysis

Referencing Style: APA 7th Edition
