

BABS1202 LAB REPORT RUBRIC

Criteria	Excellent	Very Good	Satisfactory	Unsatisfactory	Not completed
Title	Title is appropriate and clearly outlines the topic of the lab report. 2.0 ☐	Title generally outlines the topic of the lab report. 1.5 ☐	Title does not clearly outline the topic of the lab report. 1.0 ☐	Title is inappropriate and does not relate to the topic of the lab report. 0.5 ☐	No title is provided. 0 ☐
Introduction	Relevant background information is presented in a clear, logical way providing appropriate context for the reader and rationale for the project. All information provided is accurate. Suitable "in-text" references are used throughout. Aim of the project is clearly stated. 4.0 ☐	Background information is presented but is not written in a clear and/ or logical order. All information provided is accurate. "In-text" references are used throughout. Aim of the project is clearly stated. 3.0 ☐	Background information is not complete and lacks proper "in-text" citations. Aim is present but not relevant to the project and/ or clear. 2.0 ☐	Very little or no background information/ information provided is not relevant. No "in-text" citations. No aim is stated. 1.0 ☐	No introduction is provided. 0 ☐
Materials and Methods	Experimental procedures are clearly outlined in paragraph form. Information is well organised and easy for the reader to follow. There is enough detail for the reader to replicate the experiment, but not too many extraneous details. 4.0 ☐	Experimental procedures are outlined in paragraph form but is it difficult for the reader to follow. There is enough detail for the reader to replicate the experiment, but there is also too much extraneous detail. 3.0 ☐	Several components of the experimental procedure is missing. Lack of organisation is evident. There is not enough detail to replicate the experiment. 2.0 ☐	Procedural steps are incorrect, illogical, unrelated or in bullet point form. There is not enough detail to replicate the experiment. 1.0 ☐	No materials/ methods are provided. 0 ☐

Results	Key results are presented logically and clearly in both the appropriate illustrative manner (figures/ graphs/ tables) and also written text. All figures, graphs, and tables are presented correctly, numbered with appropriate captions and explicitly mentioned in the text. 4.0 ☐	Key results are presented in both illustrative manner (figures/ graphs/ tables) and also written text, however, a lack of organisation is evident and the section is difficult for the reader to follow. All figures, graphs, and tables are explicitly mentioned in the text, however, there are minor errors in the presentation of the results. 3.0 ☐	Some results are not included and/ or not presented in both illustrative manner (figures/ graphs/ tables) and also written text. A lack of organisation is evident and the section is difficult for the reader to follow. Not all figures, graphs, and tables are explicitly mentioned in the text, and/ or there are errors in the presentation of the results. 2.0 ☐	Major results are not included. Results that are presented are not in both illustrative manner (figures/ graphs/ tables) and also written text. No effort to organize the section is evident. Not all figures, graphs, and tables are explicitly mentioned in the text, and/ or there are major errors in the presentation of the results. 1.0 ☐	No results section is provided. 0 ☐
Discussion	Discussion mentions the aims of the experiment and its broader significance. The key results are interpreted and discussed using relevant terms and/ or theories. Any limitations or sources of errors mentioned. Contains a conclusion consisting of a succinct paragraph which clearly links the aims to the interpretation of the results presented in the report and discusses viable applications or real-life significance of the results and possible future directions. 6.0 ☐	Discussion mentions the aims of the experiment and its broader significance. The key results are interpreted and discussed using relevant terms and/ or theories. Any limitations or sources of errors are NOT mentioned. Contains a conclusion consisting of a paragraph which links the aims to the interpretation of the results presented in the report and discusses viable applications or real-life significance of the results and possible future directions. However, the conclusion needs work and is not clear and/ or accurate. 4.0 ☐	Discussion is brief with some mention of the aims of the experiment but the link to the broader significance is inaccurate. Some but not all key results are interpreted and discussed using relevant terms and/ or theories. Any limitations or sources of errors are NOT mentioned. Contains a conclusion consisting of a paragraph which links the aims to the interpretation of the results presented in the report and discusses viable applications or real-life significance of the results and possible future directions. However, the conclusion needs work and is not clear and/ or accurate. 2.0 ☐	Discussion is poorly written with no mention of the aims or the broader significance. Interpretation of results are poorly understood. Any limitations or sources of errors are NOT mentioned. Contains a conclusion consisting of a paragraph which links the aims to the interpretation of the results presented in the report and discusses viable applications or real-life significance of the results and possible future directions. However, the conclusion needs work and is not clear and/ or accurate. 1.0 ☐	No discussion is provided. 0 ☐

References	Report references at least TWO scientific articles. All in-text references are listed at the end of the report in the referenced list. Reference list formatted correctly, using Harvard style. 3.0 ☐	Report references at least TWO scientific articles. Most but not all in-text references are listed at the end of the report in the reference list. Reference list formatted correctly using Harvard style. 2.0 ☐	Report references less than TWO scientific articles. Most but not all in-text references are listed at the end of the report in the reference list. Reference list is formatted incorrectly and or/ not using Harvard style. 1.0 ☐	Report references less than TWO scientific articles. Many in-text references are not listed at the end of the report in the reference list. References listed are formatted incorrectly and/ or not in Harvard style. 0.5 ☐	No reference list is provided. 0 ☐
Readability	Writing is clear and succinct. Writing indicates proofreading was performed. Report is within the word count of 2000 words. 2.0 ☐	Writing is generally clear, but unnecessary words/phrases are occasionally used. Writing indicates proof reading was performed. Report is within the word count of 2000 words (10% over is allowable). 1.5 ☐	Occasional re-reading is necessary for full comprehension. Readability would be improved with proof reading. Report is within the word count of 2000 words (10% over is allowable). 1.0 ☐	Frequent re-reading is necessary for full comprehension. No evidence that proof reading was performed. Report is not within the word count of 2000 words (10% over is allowable). 0.5 ☐	No evidence that effort has been put into writing the report. Report is not within the word count of 2000 words (10% over is allowable). 0 ☐
Lab Project Notes	The lab project notes are well-organised and presented using the headings from the provided template. Notes from every lab session are accurately recorded, with the relevant information for each section filled out, focusing solely on the sections of the labs related to the lab project. 5.0 ☐	The lab project notes are organised and presented using the headings from the provided template. Notes from each lab session are accurately recorded but some headings have not been filled out every week. Notes only focus solely on the sections of the labs related to the lab project. 4.0 ☐	The lab project notes are somewhat organised but may not consistently follow the provided template headings. Notes from each lab session are recorded, but there may be some inaccuracies or incomplete sections related to the lab project as well as some notes related to parts of the labs that do not relate to the lab project present. 3.0 ☐	The lab project notes are poorly organised and do not follow the provided template headings. Notes from each lab session are often inaccurate or incomplete, with significant sections related to the lab project missing as well as some notes related to parts of the labs that do not relate to the lab project present. 2.0 ☐	The lab project notes are not completed. There is little to no recorded information from the lab sessions, and the provided template headings are not used. 0.0 ☐
